COMBINATION FLOOR LOCKER AND LOCKERBASKET SYSTEM

Details of common floor locker and LOCKERBASKET System layouts are provided in subsequent pages of this installation pamphlet. The installation of a combination floor locker and LOCKERBASKET system generally follows the preceding instructions. Installation instructions for the assembly of wall lockers should adhere to that manufacturer’s installation instructions with accommodations being made for the placement of the floor lockers.

It is important to ensure the architect’s layout for the LOCKERBASKET System does not conflict with existing overhead ducts, structural framing or obstructions. The Moore Company recommends that the installer begin with the installation of the LOCKERBASKET System before installing the floor lockers. This will provide the installer with maximum flexibility in adjusting for varying field conditions that may already exist. It is also important for the installer to pair the floor lockers and LOCKERBASKETS closely enough for the assigned employee to conveniently change clothes.
