

LOCKERBASKETS®

Moore Overhead Clothes Storage System

MOORE®
THE MOORE COMPANY, INC.

The Moore Company is based in Charleston, West Virginia with an extensive network of 350 distributors throughout the United States, Canada, Chile and Australia.

The Moore Company is affiliated with a steel fabricating and an engineering company, both of which were founded *over 100* years ago.

The Moore Company began manufacturing its overhead clothes storage system in 1950.

Here's a look at some of our competition...

Since that time more than 25 patents have been issued on improvements to the original LOCKERBASKET design.

Why use overhead storage?

There are only two secure methods of storing employee's clothing and personal effects...

Metal floor lockers

OR

LOCKERBASKETS

For industries where employees work under conditions of...

HEAT

DAMP

DIRT

DUST

...only with the use of ***overhead Moore*** **LOCKERBASKETS**, will clothes be properly dried, aerated and comfortable to wear on the next shift.

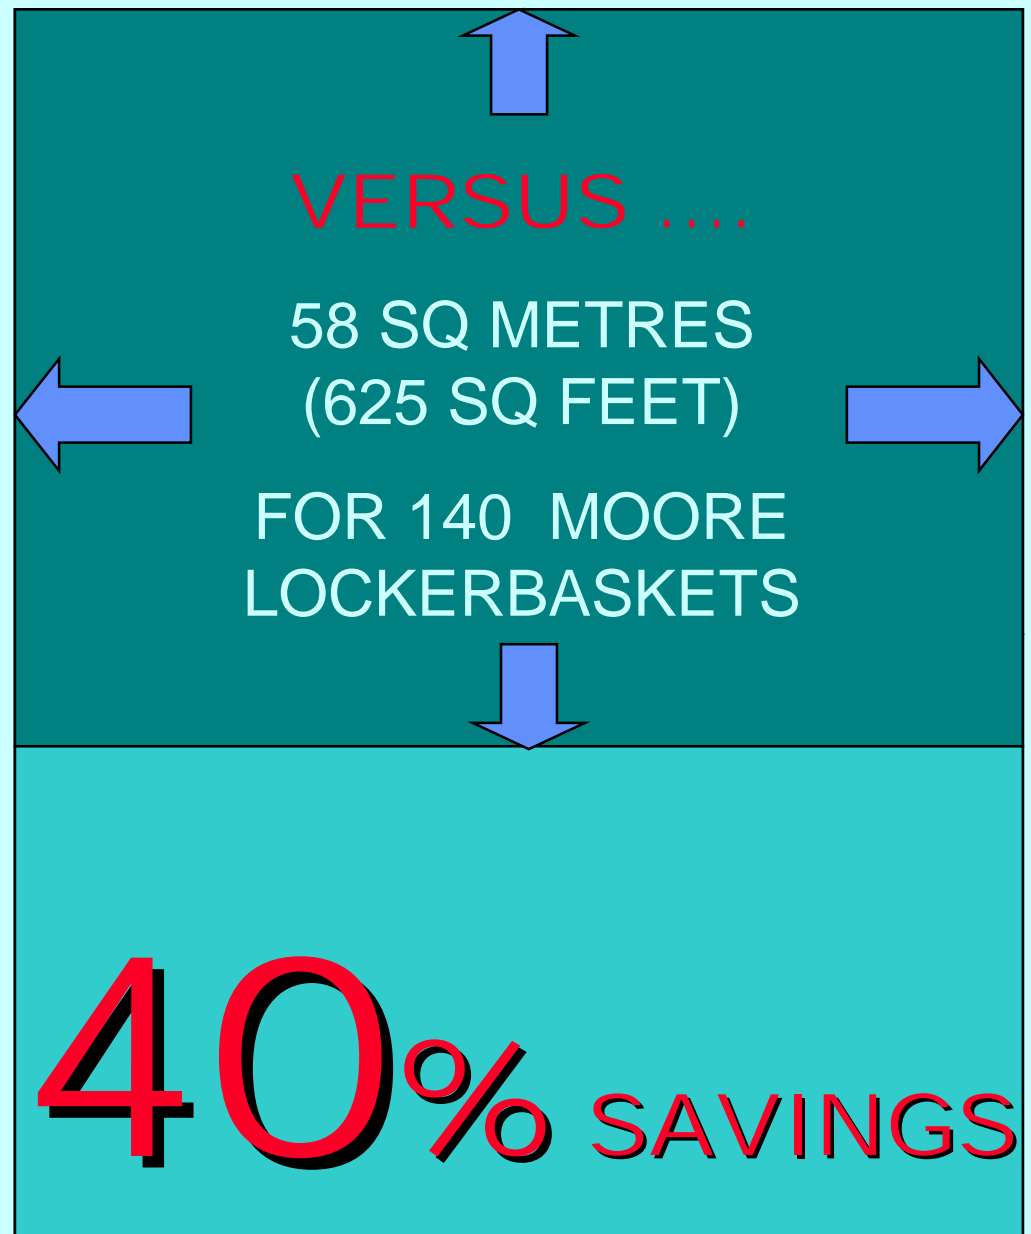

The System is designed to operate in any type of industrial building structure, whether it is a metal building, conventional beam and column building, concrete or wood frame building.

The system fits in any type of structure that has a ceiling height of 16' (minimum of 14').

COMPARE...

...this superior clothes storage system provides **COST BENEFITS** to the company.

The use of overhead **LOCKERBASKETS** substantially reduces floor area requirements, saving up to 40% on changeroom construction costs, **PLUS** provides continued economies over the entire life of the facility in heating, lighting and clean-up expenses.

Moore Overhead Clothes Storage Equipment... a fully integrated system

All Moore Company parts and accessories are design to be interchangeable with other LOCKERBASKET systems, including older systems. Each system comes complete with:

- LOCKERBASKET storage basket
- All necessary standard operating equipment
- Locking Bolt Systems
- Bench and bench supports
- Dual swivel pulleys
- Overhead support rails
- Locking Rails
- All parts necessary for system assembly except for connection to roof supports and flooring since conditions vary for each installation.

The Standard LOCKERBASKET

The standard Moore
LOCKERBASKET
comes as a six (6)
hook model and is
recommended for
heavy industry where
work conditions require
substantial clothing,
such as mining,
tunneling, foundries
and steel mills.

Engineering and Technical Support

The Moore Company will assist your project engineer in laying out your changeroom facilities, either by reviewing your existing architectural drawings or by preparing a complete layout of your changeroom for your review. This is done ***WITHOUT OBLIGATION***. Simply provide our engineering department with:

 *your employee requirements*

 *the number of employees per shift*

 *a sketch (plan and elevation) of the area in which you would like to install the equipment*

The MooreCAD program provides layouts in six languages (English, Spanish, French, Portuguese, Japanese and Simplified Mandarin Chinese) and dimensions in Imperial or Metric. Drawings can be electronically delivered to you via the Internet, by Fax or by express mail.

Information request

The background of the slide features a repeating pattern of 28 circular globe icons, each showing a different view of the Earth. These icons are arranged in a 4x7 grid. A central black rectangular box with white text is overlaid on the middle of the grid.

Through an extensive distributor network and direct communication with end users, material requirements for new installations are coordinated with factory production schedules to meet project construction needs.

THE CHANGEROOM CHOICE FOR INDUSTRY

LOCKERBASKETS deliver versatility and excellent value to the customer. Its modular design allows easy expansion to take care of increased employment levels, or can be re-arranged to accommodate changing employment patterns.
